

#BringBackTheBees

"If we can't save the bees, we can kiss goodbye the most nutritious part of the food pyramid"

-Greg Loarie

85%

of plants exist because of bees

This means we can thank
pollinators for

$\frac{1}{3}$

of the food we eat!

BUT WAIT...

1/3

of honeybees of the
world have vanished!

In **North America**

our busy little friends
are on a tremendous

DECLINE ...

Annual decline rate of
honeybee colonies is **30%**

+

= 9.5%

of the total economic value of agriculture
comes from bee pollination

SO WHAT'S CAUSING
the Bees to *Disappear*?

CHEMICAL PESTICIDES

INDUSTRIALIZED
METHODS

PARASITES

VARROA MITE

GMO

RADIATIONS

GLOBAL WARMING

MIGRATORY STRESS

NEONICOTINOIDS

POOR NUTRITION

CONTAMINATED WATER

85%

of plants exist because of bees

(WITHOUT BEES, FLOWERS WILL LOOK LIKE THIS!)

WHAT CAN YOU
DO?

Plant Wildflowers!

Steer away from
the use of neonics!

YOU HAVE A VOICE!

Share your ideas!

DID YOU KNOW?

Bees fly **15** mph?

USING

#BRINGBACKTHEBEES

ON

We can spread the word
much faster than that!
